PROJECTS

Daily Leaf

iOS Application

Published on Apple's app store.

Allows users to receive quotes as daily reminders.

Integrated SwiftUI to create an intuitive UI.

All Things Manga

Full Stack Website

Webstore replica where users can shop for manga.

Developed with a stack of web frameworks.

Johnnie Island

Personal Portfolio

Personal website for showcasing my projects.

Created using html, css and javascript.

WeatherMe

iOS Application

Displays weather information for a user's location.

Utilized Core Location to handle location data.

CaISPEED

Web Application

Designed a web based speed test interface

for CA Public Utilities Commission (CPUC).

AirLine

Android Application

Developed an app that enables users to schedule

appointments, while utilizing the Room library.
